My name is Bhargav. I have done my bachelor's in computer science and Engineering. I have a Passionate web developer with a keen eye for design to creating elegant, user-centric solutions. Proficient in HTML, CSS, and JavaScript, with hands-on experience developing responsive websites. Basic Knowledge in using frameworks such as .Net and Bootstrap to streamline development processes. Eager to contribute my technical expertise and problem-solving skills to a forward-thinking team.

## Projects

### Personal portfolio

- I did my first user-friendly project using html, CSS and javascript during my college time.
- Initially, I learned the basics of HTML, DOM, and CSS for an attractive user interface, and I also learned Javascript for an interactive, user-friendly user interface.
- I implemented a home page, an about section, contact information, and if you want to know more about me, download resume functionality is also available.
- I completed my first project successfully and gained valuable experience.

### Bookstore

- During my last semester in college, I did my internship at Ashvi Consultancy and Services. My key responsibility is to create a user-friendly book store website.
- During this crucial time, I learned new frameworks that were asp.net core and the fundamentals: dependencies, how the web page routes, what is a model-view-controller, and how they interact with the web page and SQL server. In addition to this, I have used html, css, and javascript.
- The project was successfully completed during the time period, and I was so happy to work on such a project that enhanced my skills and helped me learn new things.
